EXPERIENCE

LU Ghosal Fund , Lancaster, UK Quantitative Researcher	Oct 2025 – now
<i>LU Ghosal Fund is student run Investment fund, with a focus on equity research.</i>	
- Developed and backtested a Python-based equity-options strategy combining trend, skew, and risk-reversal signals, generating a 23.1% return and 4.28 annualized Sharpe ratio over a 60-day test period. - Implemented a regime detection strategy for equity markets using hidden Markov model and variance ratio, with total return of 32.32% and Sharpe ratio 1.013.	
Lancaster University Management School , Lancaster, UK Research Assistant	Nov 2025 – Dec 2025
<i>Lancaster University Management School (LUMS) is a globally recognized, triple-accredited business school.</i>	
Project: AI platform to improve corporate modern slavery reporting and compliance with UK Modern Slavery Act. - Mapped the existing UK-aligned knowledge base to international reporting templates, expanding the platform's scope for global applicability.	
VPBank , Ha Noi, Vietnam Data Scientist	Sep 2024 – Sep 2025
<i>VPBank is the largest private commercial bank in Vietnam by total assets as of the first half of 2025.</i>	
- Developed a dashboard for 100+ ML models, shortening improvement cycles from monthly to a weekly cadence. SME Banking: Developed a propensity model to predict SME customers likely to increase assets in the following month, achieving a 12% conversion rate and contributing to VND 100 billion in new SME assets. Retail Banking: Enhanced the churn prediction model for priority customers and developed customer personas to support targeted retention initiatives, increased conversion rate by 3%. Asset and Liability Management (ALM): Built personas for term deposit customers, which helped boost predictive model accuracy for next month's total deposit amount from 92% to 94%.	
MB Securities (MBS) , Ha Noi, Vietnam Data Analyst	Apr 2023 – Sep 2024
<i>MBS is a leading brokerage firm and a subsidiary of MBBank, the bank with the highest CASA ratio in Vietnam.</i>	
Achievements: 2024 Appreciation Initiative Award 2023 Potential Employee Award (youngest recipient). - Led implementation of a business intelligence roadmap across five business units, increasing data-driven decision-making adoption to over 50%. - Architecture revamp project: Designed data warehouse architecture and KPI semantic layers supporting 500k+ users and multiple digital products.; Controlled and designed data models from data mart layer to metrics layer. - Led the margin lending product analysis that resulted in a 33% increase in new monthly customers. - Resolved 50+ ad-hoc requests, proposed Superset for non-tech users to decrease team work-load by 10%.	
ZaloPay , Ho Chi Minh City, Vietnam Product Analyst	May 2022 – Dec 2022
<i>ZaloPay is a digital payment subsidiary of VNG Corporation, Vietnam's first USD 1 billion technology unicorn.</i>	
- Built monthly performance reports for the Core Payment team, directly presented to the CEO. - Analysed transactional data from 10 million users on Telco products, which helped initiate 3 new features. - Identified an authentication error through system log data, helped increase transaction success rates by 1.2%.
